PM-3133 Quick Start Guide Ver. 1.1

1. PM-3133 introduction

ICP DAS offers PM-3133 family in a full range of Single-phase and Three-phase smart power meters for power monitoring. The products offer a rich feature set combined with easy-to-integrate communications.

With its high accuracy (<0.5%, PF=1), the PM-3133 series products can be applied both on low voltage primary side and/or medium/high voltage secondary side and enable the users to obtain in real time the reliable and accurate energy consumption readings from the monitored equipments while in operation. These compact size and cost effective Power Meters are equipped with revolutionary wired clip-on CT (various types support input current up to 200A) and standard Modbus communication RS-485 protocol for easy deployment. It works with input voltages ranging 10V ~ 500V, supporting a wide range of applications.

1.1. Caution & Warning

The meter contains hazardous voltages, and should never be disassembled. Failing to follow this practice will result in serious injury or death. Any work on or near energized meters, meter sockets, or other metering equipment could induce a danger of electrical shock. It is strongly recommended that all work should be performed only by qualified industrial

electricians and metering specialist. ICP DAS assumes no responsibility if your electrical installer does not follow the appropriate national and local electrical codes.

ICP DAS assumes no liability for any damage resulting from the use of this product. ICP DAS reserves the right to change this manual at any time without notice. The information furnished by ICP DAS is believed to be accurate and reliable. However, no responsibility is assumed by ICP DAS for its use, not for any infringements of patents or other rights of third parties resulting from its use.

1.2. Product Warranty & Customer Support

ICP DAS warrants all products free from defects in material and workmanship for a period of one year from the date of shipping. During the warranty period, we will, at our position, either repair or replace any product that proves to be defective. To report any defect, please contact : +886-3-597-3366 or service@icpdas.com.

1.2.1. Limitation of Warranty

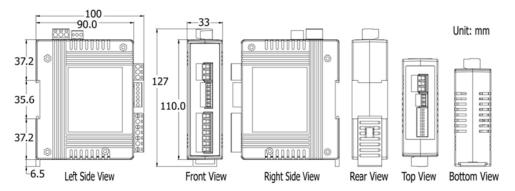

This warranty does not apply to defects resulting from unauthorized modification, misuse, or use for reason other than electrical power monitoring. The supplied meter is not a user-serviceable product.

2. Installation

Please use the soft dry clothes to clean the instrument.

Please do not use any chemical or detergent or volatile solvents to clean the instrument, in order to avoid any possibility of the cover damage.

2.1. Dimension

- Dimension: 127mm (length) × 33mm (wide) × 105mm (high)
- Products come with external split type clip-on CT's. Disconnect the CT's or use other CT's is highly prohibited.
- Please read this operation manual carefully before using.
- Please re-confirm the measure position.
- Reconfirm the RST (ABC) phase sequence of the power system.
- PM-3133 series can be installed as rail mounting mode or embedded, no need to drill a hole or screw to fix it (rail mounting width can up to the length of 35 mm).
- Meter auxiliary power for PM-3133 series is DC +12V ~+48V.

2.2. Voltage Input

- PM-3133 series: Input Voltage up to 500V.
 For any higher Input Voltage large than 500V, please add the PT (power transformer), and Change PT RATIO setup.
- 2. Confirm the RST (ABC) phase sequence.

2.3. Current Input

- 1. The external CT's are fragile, please handle with care.
- 2. The current input of PM-3133 series is in mA range. Only the ex-factory attached CT's can be used. The other CT's, for example, from panel will damage the instrument due to its large current (around 5A)
- 3. When more than one smart meters (PM-3133 series) are installed, please do not disconnect the CT with its original meter and mix use with each other. Since each set of smart meter (PM-3133 series) and its attached split type clip-on CT are calibrated set by set. The mix use may cause wrong measurements.
- 4. To install CT's correctly, please ensure the CT lines sequences is right before clip the CT's onto the power cable of the monitoring equipment. (Detail will be found in next section)

- 5. When measuring the current, the secondary circuit of a CT should never be opened when a load is passing through its primary. Make sure you always open the CT clip to detach the CT before removing the terminal lines. Otherwise, it will cause severe injury.
- 6. Please handle with extra care, especially when the operation space of CT's is limited.
- 7. The current direction must follow K-L marked on CT's.
- 8. Please select the right size CT's for different size of monitoring equipment cables: power cable diameter <Φ10 use 60A CT · Φ10~Φ16 use 100A CT · Φ16~Φ24 use 200A CT ·
- 9. The maximum current value cannot exceed the CT rating.

2.4. Connection

PM-3133

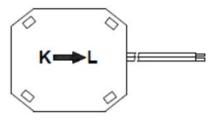

Please firstly check the current input terminal, and then in white black, white black, white black wire sequences (CT1-K,CT1-L,CT2-K,CT2-L,CT3-K,CT3-L). Then connect the CT's, and close the CT clip. Make sure the arrow direction sign on CT's follows current flow direction (K→L)

Note: it must be in the same direction.

Connect the voltage input terminal N C B A. for PM-3133, in the three phase order as follows on N C B A. Attention please!! For 3P3W-2CT, connect in N C A phase sequence, do not connect phase B (Check the diagram).

2.5. CT's installation steps

Bottom view

 At the bottom of the CT, there is a "K→L" mark.

Open the CT clip.

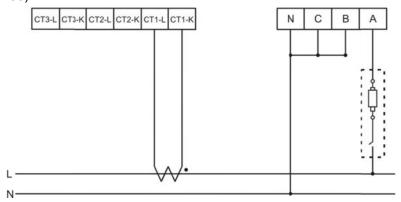

Make sure the power current direction follow
the "K→L" mark on the CT and then close
the CT clip.

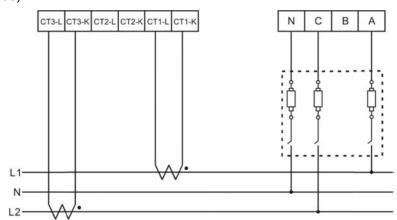

Installation steps finished.

2.6. Wiring

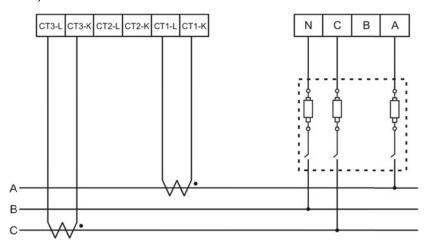

• 1P2W-1CT(PM-3133)

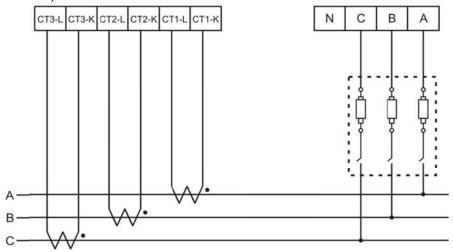

• 1P3W-2CT(PM-3133)

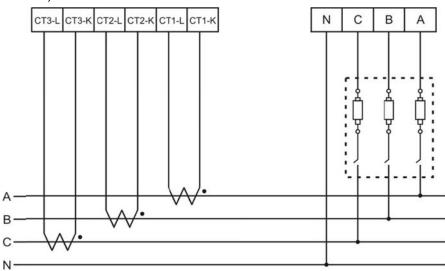

• 3P3W-2CT(PM-3133)

• 3P3W-3CT(PM-3133)

3P4W-3CT(PM-3133)

3. Relay Output & LED Indicator

Relay Output

Relay type	Power Relay, Form A (SPST N.O.)
Operating Voltage Range	250 VAC/30 VDC
Max. Load Current	5 A at 25 °C
Operate Time	6 ms
Release Time	3 ms

LED Indicator

The PM-3133 has 4 LED to indicate the unit power status, communication, and power data calculation.

- RUN: Green, light up after communication ready. LED will flash when the unit is processing communication.
- PWR: Red, Power on LED always on.
- DO0: Green. LED DO0 will light up, when DO0 is "ON".
- DO1: Green. LED DO1 will light up, when DO1 is "ON".

4. Communication

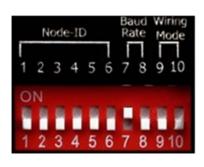

4.1. RS-485 & CAN setting

- Default setting for RS-485: **19200**, **n**, **8**, **1**, for CAN: **125K bps**
- DIP switch (SW1-SW6) is used for Modbus address(or CANopen Node
 ID) setting, default is 1, i.e. all OFF

For example: Modbus address(or CANopen Node ID) is 10, find the table of DIP switch 1-6 is ON, OFF, OFF, ON, OFF, OFF

● SW1−SW6 setting

Setting Modbus-RTU address for communication (1-64)

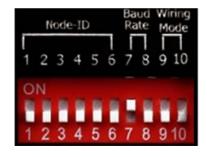

1	Modbus Address	SW 1	SW 2	SW 3	SW 4	SW 5	SW 6

SW7—SW8 setting

PM-3133: For Baud Rate Setting

RS-485	CAN	SW 7	SW8
9600 bps	125k(Default) bps	OFF	OFF
19200 (Default) bps	250k bps	ON	OFF
38400 bps	500k bps	OFF	ON
115200 bps	1M bps	ON	ON

PM-3133: Select the different wiring mode

(Please select the Software setting, if 1P2W-1CT or 1P3W-2CT is used)

Models	PM-3133		PM-3133-MTCP	
Wiring	SW 9	SW 10	SW 1	SW 2
Software setting	OFF	OFF	OFF	OFF
3P3W-2CT	ON	OFF	ON	OFF
3P3W-3CT	OFF	ON	OFF	ON
3P4W-3CT	ON	ON	ON	ON

4.2. Add the Bias Resistor on RS-485 Network for stable signal

The RS-485 master is required to provide the bias for PM-31xx series. Otherwise, the tM-SG4 or SG-785 should be added to provide the bias. All ICP DAS controllers and converters provide the bias.

4.3. Ethernet setting

Ethernet default settings:

IP Address	192.168.255.1
Subnet mask	255.255.0.0
Gateway	192.168.0.1
Port	502

4.4. Specifications

Model		PM-3133	PM-3133-MTCP	PM-3133-CPS		
AC Power Measurement						
Wiring		1P2W-1CT, 1P3W-2CT, 3P3W-2CT, 3P3W-3CT and 3P4W-3CT				
Input Voltage		10 ~ 500 V (CAT III)				
Input Current		СТ Ф10 mm (60 A); СТФ16 m	nm (100 A); СТФ24 mm (200 A))		
Input Frequence	су	50/60 Hz				
W Accuracy		Better than 0.5% (PF=1)				
Starting Curre	nt	>0.03A (60A), >0.05A (100	A), >0.09A(200A)			
		True RMS voltage (Vrms), Tru	ue RMS current (Irms), Active P	Power (kW), Active Energy		
Power Parame	eter	(kWh), Apparent Power (kVA)	, Apparent Energy (kVAh),			
Measurement		Reactive Power (kVAR), Reac	ctive Energy (kVARh), Power Fa	actor (PF)		
Data Update F	Rate	1 Second				
Communicati	on					
	Protocol	Modbus-RTU	-	-		
	Baud rate	9600,19200 (default), 38400,				
		115200;	-	-		
	Data format	N,8,1				
RS-485	Isolation	2500 VDC	-	-		
	Bias Resistor	No (Usually supplied by				
		the RS-485 Master.				
		Alternatively, add a tM-SG4	-	-		
		or SG-785)				
Ethernet	Protocol	-	Modbus TCP	-		
Luiemet	PoE	-	Yes, IEEE 802.3af			
CAN Bus	Protocol	-	-	CANopen
