Quick Installation Guide

Introduction

MEDIA

CONVERTER

IMC-111 Series is a cost-effective solution for the conversion between 10/100Base-T(X) and 100Base-FX interface, it allows you to extend communication distance by optical fiber. IMC-111 series supports MDI/MDIX auto detection, so you don't need to use crossover wires. IMC-111 series with wide operating temperature range from -40 \sim 70°C and accepts a wide voltage range from dual 12 \sim 48 VDC power inputs, so it is suitable for harsh operating nevironments.

IMC-111 series also supports the LFP (Link Fault Pass-through) feature. When one side of the link fails, the other side continues transmitting packets, and waiting for a response that never arrives from the disconnected side. Use the DIP-Switch to enable the LFP function, then IMC-111 series will force the link to shutdown as soon as noticed that the other link has failed, giving the application software a chance to react to the situation. Therefore, the IMC-111 series is reliable media converter and can satisfy most demand of operating environment.

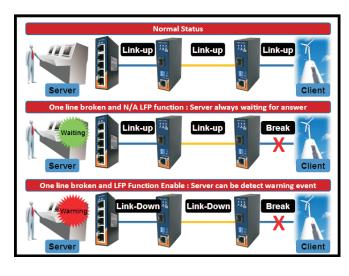

Features

- \triangleright Supports 1 port 10/100Base-T(X) auto-negotiation and auto-MDI/MDI-X
- \triangleright Supports Ethernet to fiber or Ethernet to SFP port
- Supports LFP (Link Fault Pass-through) function
- > Supports full/half duplex operation mode
- Supports store and forward transmission
 Provided DIP-Switch to setting function
- Provided DIP-Switch to setting function
 High reliability and rigid IP-30 housing
- > Fight reliability and rigid IP-50 housing
- > DIN-Rail and wall-mount enabled
